

Quatrefolic® is true success in Europe. In few years we succeeded to replace folic acid with Quatrefolic® in most of food supplements indicated for Pregnancy.

2nd issue 2018

This important goal is the result of a constant and dedicated Sales & Marketing strategy to our customer.

Gnosis provides his clients with updated and ready to use information on Quatrefolic® for the promotion of their finished product.

We do not only sell an ingredient; our aim is to accompany our customer in all steps of a new product development (formulation & analysis of the product, marketing concept).

MTHFR polymorphism linked with CAD

A newly published Indian study investigated the role of genetic polymorphism of methylenetetrahydrofolate reductase (MTHFR) as a potential genetic marker associated with Coronary Artery Disease (CAD), and observed that the presence of the MTHFR C677T was significantly associated with CAD.

The percentage was greater with other common risk factors. MTHFR plays a crucial role in the metabolism of folates and irreversibly converts them in the metabolically active form, the 5-MTHF.

(Tantray et al. A Study of C677T Polymorphism of Methylenetetrahydrofolate Reductase (MTHFR) Gene and It's Susceptibility in Coronary Artery Disease Asian Journal of Biology)

Plenty of applause to Quatrefolic® during latest events: the evidence that Gnosis scientific support never stops!

During the 16th National Congress of Turkish Society of Obstetrics and Gynaecology held in Antalya (Turkey) on May 11th, Silvia Pisoni had the pleasure to present Quatrefolic® - the biologically active form of folate (5-MTHF) - as one of the ingredients composing a product specifically designed for women and distributed in Turkey.

The topic discussed was focused on Gnosis particular attention to women longing for motherhood. Quatrefolic® in fact, as a source of 5-MTHF, supports women during preconception, pregnancy and lactation, where the demand of folate increases due to the very active cell growth.

A large number of auditors discovered the benefits of Quatrefolic®, which offers advantages also for cellular health, mood and neurological functions.

When it comes to innovation and high quality, Gnosis is always there!

Congratulations to VitaCholine™ by Balchem for being selected as a finalist of *NutraIngredients Awards* in the Ingredient of the Year category for Infant Nutrition.

The finished product, "EFA-MOM" by New Life including Vitacholine™ - the premier source of Non-GMO choline, is suggested for usage during preconception, pregnancy and lactation and we are pleased that also **Quatrefolic®**, the active form of folate providing a "natural" and "bioactive" dose of folate, is one of the active ingredients of this innovative and efficient finished product.

Balchem has developed this successful ingredient demonstrating the importance of using high-quality ingredients for a real pursuit of health!
